T-cell selection
apoptosis during 346
in hu-PBL-SCID mouse model 529–533
role of thymic stromal cells 336–338
T-cell epitopes and 561–563
T-cell tolerance
post-thymectomy 64
T-cell vaccination
in autoimmune disease 80–84
TAM
new nomenclature – ITAM 110 (L)
TAP
evolution of 467
in MHC class I processing pathway 360
TCR *see* T-cell receptor
TCR β-chain signaling
in early thymocytes 99–105
TCR repertoire *see* T-cell receptor, -repertoire
Tetrachlorodecaoxygen (TCDO)
use in HIV 250
Th-cell loss
in HIV-infected chimpanzees 515
Th0
in allergy 381
Th1/Th2 model, paradigm lost? 374–379
Th1 response
AIDS in Africa and 188
in EAE 34
epitope spreading and 72
in HIV 356
hormonal rhythms and 605 (L)
in IDDM 34–38, 172
to intracellular pathogens 338–342
in organ-specific autoimmunity 355, 383–386
in phylogeny 220–223
Th1/Th2 model, paradigm lost? 374–379
Th2 response
AIDS in Africa and 188
B-1 cells in the gut and 536
CD30 expression in 76
in HIV 356
hormonal rhythms and 605 (L)
in IDDM 34–38, 172
in IgE-mediated allergy 381
to intracellular pathogens 338–342
in the lung 235
in organ-specific autoimmunity 355, 383–386
in phylogeny 220–223
Th1/Th2 model, paradigm lost? 374–379
Therapy *see* Gene therapy, Immunotherapy, Radioimmunotherapy
Thymectomy
induction of autoimmunity 61–67
Thymic emigration
conveyor belts or lucky dips? 268–274
Thymic epithelium *see also* Thymic stromal cells
thymocyte–stromal cell interactions 336–338
transcription factors controlling development 555–556
Thymic stromal cells *see also* Thymic epithelium
interaction with thymocytes 336–338
lineage commitment 555
Thymocyte
DN to DP transition 99
emigration from thymus 268–274
pre-T-cell receptor signaling 100
role of p56^{lck} 101–103
RAG expression in resting and cycling 284
signal transduction in 99–105
–stromal cell interactions 336–338
Thymus
medulla, model of thymocyte emigration 268–274
TIL *see* Tumor-infiltrating lymphocytes
TNF *see* Tumor necrosis factor
Tolerance induction
in adults 121–123
Trans-activation
in B-cell development and differentiation 564–569
Transcription factors
BSAP 564–569
controlling thymic microenvironment 555–556
in MHC class II regulation 539–546
retroviral-peptide-mediated immunosuppression and 598
Transplantation
tolerance induction in adult 121–123
Transporter associated with antigen processing *see* TAP
Tumor/Tumour *see* Tumor
Tumor antigens
defined in human 334–336
presentation by dendritic cells 117
TCR expression in CTLs recognizing 593
Tumor cell recognition
dendritic cells and 117–121, 332, 547 (L)
loss of HLA class I antigens 487–494
T-cell repertoire analysis in 588–595
Tumor imaging
radioimmunodetection 261–264
Tumor immunology
antigen-loss tumor variants 335, 487–494
and cytokine gene therapy 173–175
effective vaccines? 334–336
Tumor-infiltrating lymphocytes (TILs) *see also* Cytotoxic T lymphocyte, Lymphocyte-mediated cytotoxicity
T-cell repertoire analysis of 588–595
Tumor necrosis factor (TNF)
in gene therapy 173
in multiple sclerosis 260
production by neutrophils 21–26
Tumor necrosis factor receptor
OX40 and BSAP in B-cell activation 568
Tumor-associated transplantation antigen *see* Tumor antigens
Tyrosinase *see* Tumor antigens

V
V BASE directory 240
V region
nomenclature of serological markers 191–193, 207 (L), 208 (L)
V(D)J recombination
cell cycle and 279–289
the human Ig V_H repertoire 237–242
somatic hypermutation in germinal center and 325
V-gene usage
in T-cell repertoire 176–181
Vaccines
birth-control 502 (L)
HIV 358, 518
for human tumors? 334–336
immunosenescence and 421
to intracellular pathogens 341
live-attenuated virus 131–134
T-cell in autoimmunity 80–84
Vaccinia virus *see* Poxvirus
Vascular cell adhesion molecule 1 (VCAM-1)
circulating, in inflammatory and atherosclerotic vascular disease 251 (L)
Vasculitis
circulating adhesion molecules and 251 (L)
VCAM-1 *see* Vascular cell adhesion molecule 1
Virus
infections in chicken 369
model for vaccination 131
mutants as T-cell agonists and antagonists 432–436
presentation by dendritic cells 182

W
WASP *see* Wiskott–Aldrich syndrome protein
whn gene
in thymic development 555
Wiskott–Aldrich syndrome protein (WASP)
in primary immunodeficiency 314, 512

X
X-linked agammaglobulinemia (XLA)
genetic defects in 511
X-linked hyper-IgM *see* Hyper-IgM syndrome
X-SCID
signalling defects in 511
Xenoreactivity *see also* Xenotransplantation
in hu-PBL-SCID mouse model 529–533
Xenotransplantation
complement and complement inhibitors in 59, 258
XLA *see* X-linked agammaglobulinemia

Y
YXXL motif
new nomenclature – ITAM 110 (L)

Z
ZAP-70
in primary immunodeficiency 314
